Frank Trulaske, founder and CEO of TRUE, has had the same simple philosophy of delivering superior products, service and support for over 30 years. Today, TRUE is the global leader in premium cardio equipment for the commercial and residential markets. Our goal is to be the leader in technology, innovation, performance, safety and style. TRUE has received many awards for its commercial and retail product over the years and remains the benchmark for the industry. Fitness facilities and consumers invest in TRUE products for their durable commercial platforms used in all its cardio products, both commercial and residential alike.

The proud manufacturing tradition of quality and the culture of innovation at TRUE have given rise to a full line of truly extraordinary treadmills, indoor cycles and elliptical cross-trainers. As a result, people all over the world are benefiting from the TRUE experience. Innovation across the full product line has made TRUE successful and is a trademark of the TRUE heritage. TRUE’s patented Heart Rate Control® technology is just one of the remarkable ways we deliver simple and superior performance every user can enjoy, and most importantly, use to achieve personal health and fitness goals.

TRUE strives to perfect biomechanically correct and orthopedically comfortable, functional products. Whether it be the mesh seat in the recumbent bike, the Soft Step® in the elliptical cross-trainers or the Soft System® in our treadmills, we deliver the best.

At the heart of our success is the relentless and systematic life testing of both our products and their components. We have dedicated employees who understand our philosophy is to deliver the best products in the world.

Our goal is not to sell the most cardio products in the world, but to deliver the world’s best premium equipment for our customers’ health and fitness solutions.

To own a TRUE machine is to be part of an exclusive fitness community that delivers results – your results.

Thank you for becoming a part of the TRUE experience.

CHAPTER 1: SAFETY INSTRUCTIONS

IMPORTANT SAFETY INSTRUCTIONS
SAVE THESE SAFETY INSTRUCTIONS

This elliptical is intended for in-home use only; do not use this elliptical in a commercial or institutional setting. Doing so may void the expressed warranty.

- WARNING: All EXERCISERS MUST READ ALL INSTRUCTIONS BEFORE USING THE ELLIPTICAL.
- WARNING: Heart rate monitoring systems may be inaccurate for some individuals. Over-exercising may result in serious injury or death. If you feel faint, stop exercising immediately.
- WARNING: Equipment should be immediately taken out of use if it fails to work properly or when a warning is presented electronically.

TRUE STRONGLY recommends seeing a physician for a complete medical exam before undertaking an exercise program, particularly if the user has a family history of high blood pressure or heart disease, is over the age of 45, smokes, has high cholesterol, is obese or has not exercised regularly in the past year. Additionally, TRUE recommends consulting a fitness professional on the correct use of this product. If at any time while exercising the user experiences faintness, dizziness, pain or shortness of breath, he or she must stop immediately.

- WARNING: To reduce the risk of electrical shock, always unplug this TRUE product before cleaning or attempting any maintenance activity. Do not handle the plug with wet hands.
- WARNING: To reduce the risk of burns, fire, electric shock or injury, it is imperative to connect each product to a properly grounded 110V electrical outlet. A risk of electrical shock may result from improper connection of the equipment’s grounding conductor. Check with a qualified electrician if you are unsure about proper grounding techniques. Do not modify the plug provided with this product. If it will not fit an electrical outlet, have a proper outlet installed by a qualified electrician. Your TRUE Fitness product must be properly grounded to reduce risk of shock if the elliptical malfunctions. Your elliptical may be equipped with an electrical cord, which includes an equipment grounding conductor and a grounding plug. The plug must be inserted into an outlet that has been properly installed and grounded in accordance with all local codes and ordinances. A temporary adapter cannot be used to connect this plug to a two-pole receptacle in North America. If a properly grounded 15 amp outlet is not available, a qualified electrician must install one.

- WARNING: Do not move the equipment by lifting the console. Do not use the console as a handlebar during a workout.
- WARNING: This product contains chemicals known to the state of California to cause cancer and birth defects or other reproductive harm.
- WARNING: Keep equipment stable on flat ground.
- WARNING: Replace warning labels that may be worn, damaged or missing.
- WARNING: Replace any non-working or damaged components; remove the unit from service until repair is performed.
- WARNING: To reduce the risk of burns, fire and electric shock or injury to persons, follow these instructions:
  - This appliance should never be left unattended when plugged in.
  - Do not use any type of extension cord with this product.
  - Unplug it from the outlet when not in use and before any servicing.
**CHAPTER 1: SAFETY INSTRUCTIONS**

- Do not operate the equipment while being covered with a blanket, plastic, or anything that insulates or stops airflow.

⚠️ **WARNING:** Risk of personal injury-crushing hazard when elliptical is in operation - Keep feet, hands, and fingers away from moving parts.

⚠️ **CAUTION:**
- Health related injuries may result from incorrect or excessive use of exercise equipment.
- Do not use typing or web surfing features at excessive speeds. Always stabilize yourself by holding a stationary handle when using typing or web surfing features. (Varies by console option)
- Do not use the contact heart rate grips as a handlebar during a workout.
- Any changes or modifications to this equipment could void the product warranty.
- To avoid injury stand on the side rails before starting the elliptical.
- To disconnect, turn power OFF at the ON/OFF switch if applicable, then remove plug from electrical outlet.
- Never operate a TRUE product if it has a damaged power cord or electrical plug, or if it has been dropped, damaged, or even partially immersed in water. Contact TRUE Customer Service.
- Power adapter requirements for the PS300 are 110V AC input and 9V DC 1.5Amp output.
  *Note the plug configuration for the power adapter may vary by country.
- Use a TRUE AC power cord or AC/DC adapter only
  *Note the plug configuration for the power adapter may vary by country.
- Position this product so the power cord plug is accessible to the user.
- Keep the power cord away from heated surfaces. Do not pull the equipment by the power cord or use the cord as a handle. Do not run the power cord along the side or under the equipment.
- If the electrical supply cord is damaged it must be replaced by the manufacturer, an authorized service agent, or a similarly qualified person to avoid a hazard.
- Do not use this product in areas where aerosol spray products are being used or where oxygen is being administered. Such substances create the danger of combustion and explosion.
- Always follow the console instructions for proper operation. Close supervision is necessary when used near children under the age of 15, or disabled persons.
- Do not use this product outdoors, near water, while wet, or in areas of high humidity including extreme temperature changes.
- Never operate a TRUE product with the air openings blocked. Keep air openings free of lint, hair or any obstructing material.
- Never insert objects into any openings in this product. If an object should drop inside, turn off the power, unplug the power cord from the outlet and carefully retrieve it. If the item cannot be reached, contact TRUE Customer Service.
- Never place liquids of any type directly on the unit except in the accessory tray or bottle holders. Containers with lids are recommended.
- Wear shoes with rubber or high traction soles. Do not use shoes with heels, leather soles, cleats or spikes. Make sure no stones are embedded in the soles. Do not use this product in bare feet. Keep all loose clothing, shoelaces and towels away from moving parts.
- Do not reach into or underneath the unit, or tip it on its side during operation.
- Use correct ergonomic positioning while operating the elliptical.
- Do not allow animals on or near the equipment while in operation.
CHAPTER 1: SAFETY INSTRUCTIONS

⚠️ CAUTION (CONTINUED):

- Use the side rails or upper exercise arms whenever additional stability is required. In case of emergency, the side rails should be grabbed and the user should place his/her feet on the side platforms. The side rails should be used to grasp the heart rate sensors or to rest the hand on while operating the activity zone keys.
- Do not exceed maximum user weight of 350 lbs. (158kg).
- Avoid exiting elliptical while the foot skate is still in motion.
- Do not use if you have a cold or fever.
- When using this exercise machine, basic precautions should always be followed.
- Use this elliptical only for its intended use as described in this manual.
- Do not use attachments not recommended by the manufacturer.
- Allow only trained personnel to service this equipment.
- Avoid the possibility of bystanders being struck or caught between moving parts by making sure that they are out of reach of the elliptical while it is in motion.
- Allow only one person at a time on the elliptical while it’s operating.
- It is the sole responsibility of the owner/operator to ensure regular and scheduled maintenance is performed.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children shall not play with the appliance.
- Cleaning and user maintenance shall not be made by children without supervision.
- Avoid placing hands on the upper side rail covers while elliptical is in operation. (See Fig 2)

SPACE REQUIREMENTS:

- TRUE’s recommendation is to leave a 39” safety zone at rear of elliptical. The sides of the unit should be at least 20” away from the wall or obstructions. (See Fig 1)
CHAPTER 1: SAFETY INSTRUCTIONS

GROUNDING INSTRUCTIONS:
This product must be grounded, if it should malfunction or breakdown, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. This product is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

⚠️ DANGER:
- Improper connection of the equipment-grounding conductor can result in a risk of electric shock.
- Check with a qualified electrician or serviceman if you are in doubt as to whether the product is properly grounded. Do not modify the plug provided with the product. If it will not fit the outlet, have a proper outlet installed by a qualified electrician.
- Do not remove the motor cover or you may risk injury due to electric shock.
- The 120-V model is for use on a nominal 120-V circuit and has a grounding plug that looks like the plug illustrated in figure A. Make sure the product is connected to an outlet having the same configuration as the plug. No adaptor should be used with this product.
- The 230-V model is for use on a circuit having a nominal rating more than 120-V and is factory-equipped with a specific electric cord and has a grounding plug that looks like the plug illustrated in figure B. Make sure that the product is connected to an outlet having the same configuration as the plug in Figure B. No adapter should be used with this product. If the product must be reconnected for use on a different type of electric circuit, the reconnection should be made by qualified service personnel.

Grounding Pin
CHAPTER 1: SAFETY INSTRUCTIONS

POWER REQUIREMENTS FOR TRUE PRODUCTS

NOTE: Read and understand all instructions on this sheet and in the Owner’s manual before plugging any TRUE power cord into an electrical outlet. This information sheet will help you identify the voltage and cords you need where you live and will outline requirements for:

- Grounded, dedicated lines
- Voltage
- Power cords
- Power adapters
- Extension cords

!DANGER: Improper connection of the equipment-gnding conductor can result in risk of electric shock. Check with a qualified electrician or service provider if you are in doubt as to whether the equipment is properly grounded or installed on a dedicated line. Seek a qualified electrician to perform any modifications to the cord or plug. TRUE is not responsible for injuries or damages as a result of cord or plug modification.

!CAUTION: Place cords away from heat (such as baseboards). Use care to arrange any cord so it doesn’t become an obstacle.

Extension Cords
Do not use an extension cord to supply power to any TRUE product.

Grounded, Dedicated Line
TRUE equipment must be grounded. If it should malfunction or break down, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. TRUE cords (except for cycle adapters) have an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances where you live. Do not use a ground plug adapter to adapt the power cord to a non-grounded outlet. Do not use a GFCI outlet or GFCI circuit breaker.

A dedicated line will assure that adequate power is available for safe operation over the life of your TRUE Product.

Voltage
Voltage required for your unit is located on the serial number decal (usually on the front of the unit). Depending on where you live voltage requirements differ.

For example, in the United States some TRUE treadmills require a circuit rated 115 VAC, 60 Hz and 20 amps. See Figure 1. However, a home typically has 15 amp outlets. In this case, contact an electrician to install a 20 amp dedicated line prior to use. See Figure 2.

![Diagram of power requirements](image)

Figure 1

For the United Kingdom some TRUE products require a circuit rated 230 V, 50 Hz, 15 amps. Some products may require a dedicated circuit rated 230 V, 15 amps. See Figure 3.

![Diagram of power requirements](image)

Figure 3
CHAPTER 1: SAFETY INSTRUCTIONS

WARNING DECALS:

⚠️ WARNING: Replace warning labels that may be worn, damaged or missing.

*To replace any worn or missing warning decals contact TRUE FITNESS by one of the following: www.truefitness.com or contact customer service at 800-883-8783.

⚠️ WARNING!

Read and understand all instructions and warnings prior to use.

All exercise equipment is potentially hazardous. If attention is not paid to the conditions of the equipment usage, death or serious injury could occur.

COMPLIANCES:

This equipment complies with all applicable codes and regulations. For a complete list of compliances, please visit www.truefitness.com.
CHAPTER 2: ASSEMBLY INSTRUCTIONS

IMPORTANT SAFETY INSTRUCTIONS

- Read and understand all instructions and warnings prior to use.
- Obtain a medical exam before beginning any exercise program. If at any time during exercise you feel faint, dizzy, or experience pain, stop and consult your physician.
- Obtain proper instruction prior to use.
- Read, understand, and test the emergency stop procedures before use.
- Inspect the elliptical for incorrect, worn, or loose components and do not use until corrected, replaced, or tightened prior to use.
- Do not wear loose or dangling clothing while using elliptical.
- Care should be used when mounting or dismounting elliptical.
- Disconnect all power (if applicable) before servicing elliptical.
- Do not exceed maximum user weight of 350 lbs.
- Keep children and animals away.
- Do not operate an electrically powered elliptical in damp or wet locations.
- All exercise equipment is potentially hazardous. If attention is not paid to the conditions of equipment usage, death, or serious injury could occur.
- Keep the top side of the moving surface clean and dry.
- This machine is intended for residential use only.
- All exercise equipment is potentially hazardous. If attention is not paid to the conditions of the equipment usage, death or serious injury could occur.

*Should you need technical assistance in assembly of your TRUE Fitness product, contact TRUE Fitness Technical Support at 1-800-883-8783.

PRE-ASSEMBLY CHECK LIST:

**Tools Required:**
- 10mm hex key (Included)
- 8mm hex key (Included)
- 6mm hex key (Included)
- #2 Phillips Screwdriver

**Hardware:**
Hardware is packaged in numbered plastic bags that correspond to the step with which they are used. Not all steps require hardware.
CHAPTER 2: ASSEMBLY INSTRUCTIONS

ELLIPTICAL ASSEMBLY STEPS:

⚠️ CAUTION:
- It is recommended that two people unpack and assemble elliptical.
- Remove bands from packaging and pull top from pallet.
- Remove all parts from packaging. Leave machine on pallet.
- For each step use hardware in the corresponding bag.

Parts Identification:
Use this page to identify the parts used in each step

- Exercise Arms
  Step 4
- Side Arms
  Step 3
- Console
  Step 6&7
- Push Rods
  Step 1 & 2
- Neck Shroud
  Step 7
- Pedestal
  Step 1
- Handle Bars
  Step 1&9
- Boot
  Step 1
- Base
  Step 1
- Floor Levelers
  Step 8
CHAPTER 2: ASSEMBLY INSTRUCTIONS

ELLIPtical ASSEMBLY STEPS (CONTINUED):

Pre-Assembly STEP 1: Install Transport Handle Bars:

a) **Important:** With machine still on pallet, attach handle bars to the front and rear of machine. Handle Bars will provide assistance in moving machine. Figures 1 & 2

b) **Carefully** remove Elliptical from pallet.

c) **Important:** After final machine placement has been completed, remove transport handle bars from machine and store handle bars with owner’s manual.

Pre-Assembly STEP 2: Measure Doorways:

a) Measure all doorways, hallways and stairwells to make sure that the fully assembled elliptical (33 inches wide) can fit through them.

b) If the fully assembled unit will not clear the doors and walls, move all parts to the final location and assemble machine in that location. When moving the machine, keep the left side Styrofoam attached to the Base to help avoid damaging the plastic covers. Set the base on the Styrofoam or the feet only. Figure 4

⚠️ **Please Note When Moving The Elliptical:**

- Do not insert fork from fork truck in this location. There are exposed parts that can be damaged.

- Elliptical base can be set on its LEFT side, but ONLY with the attached Styrofoam underneath it.
CHAPTER 2: ASSEMBLY INSTRUCTIONS

ELLIPTICAL ASSEMBLY STEPS (CONTINUED):

STEP 1: Attach Push Rods:

a) Rotate crankshaft to the rear on the side that you are installing then insert the push rod as shown.

b) Once the pushrod is inside the shroud, rotate the crankshaft forward until the connection joint is accessible through the hole in the shroud.

Align the pushrod so that it is accessible through the shroud.

Move crank shaft back to front after push rod is inserted.

 Hardware Required (Bag 1):

2 M10x55mm Bolts

Hardware Required (Bag 1):

2 M10x55mm Bolts

Rotate Crankshaft to the rear for push rod installation.
CHAPTER 2: ASSEMBLY INSTRUCTIONS

ELLIPTICAL ASSEMBLY STEPS (CONTINUED):

STEP 1: Attach Push Rods (continued):

d) Place Rubber Caps in the holes after assembly.

Hardware Required (Bag 1):

2 Rubber Caps

STEP 2: Assemble Pedestal to Base:

a) Remove front handles before assembling pedestal.

b) Use 2 people to slide the Pedestal straight down onto the Base and be careful to not pinch the wires on the right side of the base.
CHAPTER 2: ASSEMBLY INSTRUCTIONS

ELLIPITCAL ASSEMBLY STEPS (CONTINUED):

STEP 2: Assemble Pedestal to Base (continued):

c) Use 2 M12x12mm bolts and 8 M8x12mm bolts to attach Pedestal to Base and connect the 3 cables coming from the right pedestal to the corresponding wires in the base.

Hardware Required (Bag 2):
- 8 M8x12mm Bolts
- 2 M12x12mm Bolts

STEP 3: Attach Top of Push Rods:

a) Slide the shaft through the bearing on the top of the push rod and use 2 bolts, 2 lock washers and 2 flat washers to secure the push rod to the shaft.

b) Use the plastic caps to cover the top of the push rod.

Hardware Required (Bag 3):
- 2 M10 Bolts
- 2 Flat Washer
- 2 Lock Washer
- 2 Plastic Caps
 CHAPTER 2: ASSEMBLY INSTRUCTIONS

ELLIPTICAL ASSEMBLY STEPS (CONTINUED):

STEP 4: Attach Side Arms:

a) Connect Cardio Arm Heart Rate Cable
b) CAREFULLY Slide Side Arm into Pedestal and tuck the Heart Rate Cable into the plastic housing. Make sure to not pinch the Heart Rate Cable wires.

c) Use 4 M8x12mm bolts to tighten the Side Arms into the underside of the Pedestal.

Hardware Required (Bag 4):

- 4 M8x12 bolts

STEP 5: Attach Upper Body Cardio Arms:

a) Install each upper arm with 4 M8x20mm bolts and 4 lock washers using an 8 mm hex key.

Note: Upper Arms are labeled “L” for Left and “R” for Right.

Hardware Required (Bag 5):

- 8 M8x20mm Bolts
- 8 Lock Washer
CHAPTER 2: ASSEMBLY INSTRUCTIONS

ELLIPTICAL ASSEMBLY STEPS (CONTINUED):

STEP 5: Attach Upper Body Cardio Arms (continued):

b1) Attach the inner Cardio Arm Covers using 2 M5x8mm screws.

**Hardware Required (Bag 5):**

- 4 M5x8mm Screws

STEP 6: Attach Pedal Tubes:

a) Use 2 M10x80mm bolts and M10 nuts to attach Pedal Tubes. Make sure that pedal tubes are centered on the rollers on the Crankshaft before tightening the bolts.

**Hardware Required (Bag 6):**

- 2 M10x80mm Bolts
- 2 M10 Nuts

b) Attach the Front Pedal Tube Covers using 8 M5x12mm screws.

**Hardware Required (Bag 6):**

- 8 M5x12mm Screws
CHAPTER 2: ASSEMBLY INSTRUCTIONS

ELLIPTICAL ASSEMBLY STEPS (CONTINUED):

STEP 7: Attach Console:

a) Slide Console cables through Console Mast and attach Mast using 2 M8x12mm bolts.

CAUTION: Do not pinch wires!

Hardware Required (Bag 7):

2 M8x12mm Bolts

b) Attach the wires coming out of the top of the neck to the back of the console as shown.
c) Remove the Ground Screw from the plate on the neck and use it to screw the Ground Connector back into the same hole.

Note: The network cable is built in for future use and is not used for this installation.
CHAPTER 2: ASSEMBLY INSTRUCTIONS

ELLiptical Assembly Steps (Continued):

STEP 7: Attach Console (continued):

d) Tuck access wires into the neck and attach the console to the neck using the 4 bolts included with the console.

Required Hardware:
Included with console

STEP 8: Floor Levelers:
a) If necessary, adjust four levelers on bottom of machine to accommodate uneven flooring.

STEP 9: Remove Transport Handle Bars:
a) Once Elliptical is moved into its final location, remove the two Handle Bars on the back of the machine and store with owner’s manual for future use.

STEP 10: Remove Protective Film from Decals:
a) Once Elliptical is moved into its final location, remove the protective film from the decals and from the “True” on the lower shroud.
CHAPTER 3: PRODUCT OVERVIEW

ELLIPTICAL OVERVIEW:

- Console Assembly
- Upper Exercise Arms
- Contact Heart Rate Pads
- Leveling Feet
- Transport Handle
- Access
- Side Steps
- Foot Pads
- Power Cord
- Leveling Feet
CHAPTER 3: PRODUCT OVERVIEW

ELLIPTICAL OVERVIEW (CONTINUED):

**Console Assembly:**
The console allows the user to set up a workout program and control the elliptical during a workout (For console overview and operation instructions refer to the owner’s manual for the selected console option).

**Upper Exercise Arms:**
Moving handles on the elliptical that provide resistance to the upper body during a workout.

**Contact Heart Rate Pads:**
Allows the user to check their heart rate without wearing a wireless chest strap.

**Side Steps:**
The stationary steps on either side of the elliptical, which allow the user to safely straddle the footpads during startup, to isolate upper body, or in the event of an emergency.

**Transport Handles Access:**
Threaded sockets in the frame of the elliptical that will accept the transportation handles.

**Foot Pads:**
Moving pedals on the elliptical that provide resistance to the lower body during a workout.

**Leveling Feet:**
An adjustable system used to aid in the leveling the elliptical.

**Power Cord:**
Delivers power from the wall outlet to the elliptical.
HEART RATE MONITORING:
This elliptical can monitor a user’s heart rate using either a Polar® compatible chest strap or the metal grips on the hand rails (called contact heart rate or CHR pads). A chest strap transmits the user’s heart rate to the elliptical via radio, and the CHR pads connect to a special computer circuit to extract the user’s heart rate.

Chest Strap Heart Rate Monitoring:
Although this elliptical functions fine without using the heart rate monitoring feature, this kind of monitoring gives valuable feedback on the user’s effort level. Chest strap monitoring also allows users to use Heart Rate Control, the most advanced exercise control system available. When users wear a Polar® compatible transmitter strap, the elliptical will display the user’s heart rate as a digital beats-per-minute (bpm) readout.

The transmitter strap should be worn directly against the user’s skin, about 1-2 inches below the pectoral muscles/breast line. Women should be careful to place the transmitter below their bra line. Initially the transmission signal for heart rate may be erratic or non-existent. Some moisture is necessary between the strap and the user’s skin for proper transmission. Sweat from exercise works best, but ordinary tap water may be used prior to the workout if desired.

A Note on Chest Strap Heart Rate Monitoring:
The chest strap produces a radio signal that the elliptical reads and registers as the user’s heart rate. The accuracy of a reading may be affected when outside interference is present.

Contact Heart Rate (CHR):
The CHR system will let the user monitor their heart rate without wearing a chest strap. When using the CHR system users should gently grasp the CHR pads with both hands. Within 30 seconds, the user’s heart rate should be displayed as a digital bpm readout (during the first 30 seconds the system is analyzing and locking in the user’s heart rate). Users should exercise with smooth body motions and breathe regularly. It is best to avoid talking while using the CHR system, as talking will cause unrepresentative heart rate spikes of 5 to 10 bpm. To ensure an accurate reading, the user’s hands should be clean, free of both dirt and hand lotions.

A Note on CHR Accuracy:
CHR monitoring may be less accurate than chest strap monitoring since the heart rate signals are much stronger at the chest.

HEART RATE CONTROL (HRC):
Introduction:
You are now the owner of the most sophisticated Heart Rate Control equipment available. TRUE HRC is unique and patented. It accommodates users from rehabilitation to world class athletes, and all those in between. TRUE HRC allows users to do a completely adjustment free heart rate controlled workout. By training at a specific target heart rate, users can exercise at a more efficient cardiovascular level.
HEART RATE CONTROL (CONTINUED):

The TRUE HRC system is unique because users must enter the key parameters of the workout; target heart rate, weight, age, and time, prior to beginning the HRC workout. As users approach their target heart rate, the elliptical’s computer takes full control over the workout and changes the workout intensity automatically to keep users near their target heart rate. This allows for a completely “hands free” workout.

Target Heart Rate:
TRUE’s heart rate control (HRC) workouts let the elliptical monitor relative exercise intensity by way of the user’s heart rate, then automatically adjust the workout intensity to keep the user at their target heart rate and thus their desired exercise intensity. Heart rate is a good measure of the body’s exercise stress level. It reflects differences in physical condition, fatigue, the comfort of the workout environment, even diet and emotional state. Users should compare their heart rate with how they feel to ensure safety and comfort.

Consult a physician to determine target heart rate:
Using heart rate to control a workout takes the guesswork out of the workout settings. Consult a physician before using heart rate controlled workouts for advice on selecting a target heart rate range. Also, it is important to use the elliptical for several workouts in the manual mode while monitoring heart rate. Users should compare their heart rate with how they feel to ensure safety and comfort. After users have spent some time learning how their heart responds to different workout intensity levels, they will have a better understanding of how to use the elliptical to reach their target heart rate.

Warm Up:
At the beginning of an HRC workout, the elliptical is in full Manual Control mode. Users should gradually increase the workout intensity to slowly raise their heart rate to within 10 beats per minute (bpm) of their target heart rate. The elliptical will operate as if in manual mode during the warm up stage. Users control the workout intensity. It is important that the user starts at a low level of perceived exertion and gradually increase the workout intensity over several minutes until they approach their target heart rate. This allows the body to adapt to the workout. Increasing the workout intensity gradually will allow the user to enter the heart rate control stage without overshooting their target, keeping their heart rate within a few bpm of their target.

*Warming up too fast may cause the user to overshoot their target. If this occurs it may take several minutes before the computer software can control their heart rate. Users may overshoot and undershoot for several minutes until control is achieved.

Heart Rate Control Stage:
The elliptical takes full control of the workout intensity, keeping the user’s heart rate within a few bpm of their target.

Cool-Down:
At the end of the workout time or distance, the elliptical reduces the workout intensity by half and goes back into Manual Control mode, where users directly control their cool-down.
CHAPTER 4: PROGRAMMING & OPERATION

PROGRAM DESCRIPTIONS:

Quick Start:
A workout in which the user controls all settings. The workout continues until it is ended by the user.

Manual:
Users set up their own workout to a TIME or DISTANCE limit

Rolling Hills:
A series of gradual increasing and decreasing WORKLOAD changes that simulate rolling hills. Users can adjust the LEVEL at any time during the workout to increase or decrease intensity of the hills.

Single Hill:
WORKLOAD increases to a maximum at the mid-point of the workout, then decreases to the finish to simulate one big hill.

Sports Intervals:
This workout uses PACE SETTER to suggest walking then running intervals in 1-minute segments. WORKLOAD can be adjusted throughout workout.

Easy Intervals:
This workout suggests PACE (RPM) intervals in 1-minute segments. The PACE SETTER shows the target pace along with the user’s actual pace (RPM) throughout the workout.

HRC Cruise Control:
While in any program, Cruise Control will allow the user to set current heart rate as target heart rate by pressing a single button. The Cruise Control program takes control of WORKLOAD to maintain the users target Heart Rate. If Beats Per Minute exceeds the target by more than 12 BPM the workout will end and Cool Down will begin.

HRC Target:
Users choose their target heart rate. The workout begins in MANUAL control - gradually increase WORKLOAD until heart rate is within 10 bpm of their target. At this point, the machine takes control of WORKLOAD to maintain the user’s heart rate within a few beats of their target.

Random Hills:
A WORKLOAD profile that changes to simulate random hills. Adjust the LEVEL at any time during the workout to increase or decrease the intensity of the hills.

WARNING!
All exercise equipment is potentially hazardous. If attention is not given to the conditions of the equipment, injury or death may occur.

Read and understand all instructions and warnings prior to use.

Obtain a medical exam before beginning any exercise program. If at any time during exercise you feel faint, dizzy, or experience pain, stop and consult your physician.

Do not wear loose or dangling clothing while using the machine.
Care should be used when mounting or dismounting machine.
Keep children away.
CONSOLE OVERVIEW (CONTINUED):

Workload Keys:
Manually increases or decreases the workout intensity.

Start:
Allows the user to begin a Quick Start workout or preset workout.

Workout Finder:
Pressing this button scrolls through available workouts. When the desired workout is displayed, the user must press enter to input user data and begin the workout.

Change Display:
Toggles the data in the upper LED display between available options.

Reading Rack:
A ledge on the console that can be used to hold a book, magazine, e-reader, or tablet computer during a workout.

Warning Decal:
Important safety information for users to review prior to using the equipment.

Target HRC:
Starts a Target HRC workout.
*See Program Descriptions Section

Enter:
Press this key to confirm a selection in a preset workout.

HRC Cruise Control:
Engages Heart Rate Control to allow the equipment to maintain the user’s current heart rate through automatic workload adjustments (when the user is utilizing heart rate monitoring).

Numeric Keypad:
Highlights the muscle groups being targeted during a Cardio 360™ workout segment.

Cardio 360™ Quick Start:
 Begins a Cardio 360™ Quick Start Program
*See Program Descriptions Section

Lower LED Display:
Displays the workout profile of the current program.
CHAPTER 4: PROGRAMMING & OPERATION

CONSOLE OVERVIEW (CONTINUED):

Upper LED Display:
Shows the workout data of the program in progress in four value displays.

<table>
<thead>
<tr>
<th>Value Display #1</th>
<th>Value Display #2</th>
<th>Value Display #3</th>
<th>Value Display #4</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Standard Value</strong></td>
<td><strong>Value When CHANGE DISPLAY Button is Pressed</strong></td>
<td><strong>Value When CHANGE DISPLAY Button is Pressed</strong></td>
<td><strong>Value When CHANGE DISPLAY Button is Pressed</strong></td>
</tr>
<tr>
<td>Time – The amount of time remaining in the workout.</td>
<td>Work Level – The selected workload level.</td>
<td>Watts – The amount of mechanical power the unit is receiving from the user.</td>
<td>METs – The user’s metabolic equivalent.</td>
</tr>
<tr>
<td>Distance – An estimate of how far the user has traveled.</td>
<td>Watts – The amount of mechanical power the unit is receiving from the user.</td>
<td>METs – The user’s metabolic equivalent.</td>
<td>Calories – an estimate of the calories burned.</td>
</tr>
<tr>
<td>RPM – The user’s pedal cadence.</td>
<td>Watts – The amount of mechanical power the unit is receiving from the user.</td>
<td>METs – The user’s metabolic equivalent.</td>

</tr>
<tr>
<td>Calories – an estimate of the calories burned.</td>
<td>Watts – The amount of mechanical power the unit is receiving from the user.</td>
<td>METs – The user’s metabolic equivalent.</td>
<td>Calories – an estimate of the calories burned.</td>
</tr>
</tbody>
</table>

*The estimate does not include the user’s basal metabolic rate.

CONSOLE NAVIGATION:

Selecting a Preset Workout:
To begin a preset workout, press the Workout Finder button (A) until the desired program is shown in the Upper LED Display (B) and then press the Enter button (C).

*To begin a Target HRC Workout, press the HRC Cruise Control button (D) followed by the Enter button (C)
CONSOLE NAVIGATION (CONTINUED):

Workout Data Entry:
Before beginning a preset workout, the console will ask the user for information in order to give more accurate workout data. To adjust the Data Value (A), use the Up and Down Workload Keys (B). Once the desired value is displayed, press Enter (C) to move to the next Data Value. Once all data has been entered press Start (D) to begin the workout.

Workout Summary:
Once a workout has ended the console will display a workout Summary which will give the user an overview of their workout which includes; Time, Average Heart Rate, Max Heart Rate, Average RPM, Max RPM, Distance and Calories. To Clear the Summary and return to the home screen press and hold the Enter button (A).
CHAPTER 4: PROGRAMMING & OPERATION

CONSOLE NAVIGATION (CONTINUED):

**Cardio 360™:**
TRUE’s unique Cardio 360™ is like having a personal trainer built in to the elliptical, walking users through a full-body workout. In just minutes, users will work their upper-body, lower-body and core. Plus, with the variety that Cardio 360™ brings, it will take the bore out of working out. The program walks users through the various movements they need to do to achieve the complete workout, so all they need to do is commit to stepping on the machine.

To Begin a Cardio 360™ workout, simply press the Cardio 360™ Quickstart Key (A) or use the workout finder (B) to select between these Cardio 360™ preset workouts:

**Cardio 360™:**
A random cycle of Cardio 360™ exercises for a great total-body workout.

**Cardio 360™ Quick Start:**
Get right into a pre-set 20-minute workout designed to shape and tone every major muscle group.

**Cardio 360™ Arm Sculptor:**
Users challenge their upper body and core in this 10-minute, 3-motion program, and follow along at their own intensity.

**Cardio 360™ Leg Shaper:**
Users tighten and tone their legs and glutes, changing resistance on the fly.

Cardio 360™ workouts are broken down into workout segments in which the user is directed by the unit. The Upper LED Display (C) will provide the user with the instructions for the current workout segment.
CHAPTER 4: PROGRAMMING & OPERATION

ADVANCED CONSOLE FUNCTIONS:

⚠️ WARNING:
Misconfiguration of the console may cause damage to the unit and void the manufacturer warranty. If necessary, please contact TRUE Fitness Technical Support at 800-883-8783 for assistance.

Entering Diagnostics Mode:
With the console powered up
Press and hold the + WORKLOAD key for 10 seconds or until the console beeps. NOTE: If the sound is turned off no beep will be emitted from the console.
Continue holding the +WORKLOAD key and simultaneously press the ENTER key.
Use the + or - WORKLOAD keys to select SETUP then press ENTER
Use the + or - WORKLOAD keys to scroll through the available options then press ENTER to select
Use the + or - WORKLOAD keys to adjust options then press ENTER
Use the + or - WORKLOAD keys to scroll to the end of the options list then press ENTER to Exit.

Available options:
- Display Units (English, German, French or Spanish language)
- Time (Sets the default program time)
- Weight (Sets the default user weight)
- Pause Duration (Time the console will wait before resetting when in a program)
- Sleep (Sets the time the unit sit unused before the console goes into sleep mode)
- Sound (on or off)
- RPM (Not used)

Setting the Sleep Timer:
The following steps allow the Sleep Timer (time without use after which the console will go dim) to be adjusted. The default Sleep Timer is 30 minutes*.

STEP 1: Press and hold the “Workload +” button until you hear a beep. Continue to hold the “Workload +” button
STEP 2: While holding the “Workload +” button, press the “Enter” button. Release both buttons.
STEP 3: The console display window should read “ENTER MODE SEL”. If this is not visible, repeat steps 1 & 2.
STEP 4: Use the “Workload +” and “Workload -” buttons to cycle through the menu.
STEP 5: When the display window reads “SETUP”, press the “Enter” button.
STEP 6: Use the “Enter” button to cycle through the console setup menu**
STEP 7: When the display window reads “SLEEP TIMER”, use the “Workload +” and “Workload -” buttons to adjust the Sleep Timer feature
STEP 8: Press and hold the “Enter” button to exit

*If a workout has been paused, the Sleep Timer does not begin until the Pause Timer is complete.
CHAPTER 5: CARE & MAINTENANCE

CARE & MAINTENANCE:
It is important to perform the minor maintenance tasks described in this section. Failure to maintain the elliptical as described here could void the TRUE Fitness Warranty. To reduce the risk of electrical shock, always unplug the unit from its power source before cleaning or performing any maintenance tasks.

Inspection:
TRUE Fitness is not responsible for performing or scheduling regular maintenance or inspections. Users should inspect the elliptical daily. Look and listen for slipping belts, loose fasteners, unusual noises, worn or frayed power cords, and any other indications that the equipment may be in need of service. If any of these are noticed, obtain service. Do not attempt to use the elliptical until proper service has been performed or damaged parts have been replaced.

Important:
If you determine that the elliptical needs service, make sure that the elliptical cannot be used inadvertently. Turn the unit off, and then unplug the power cord from its power source. Make sure other users know that the elliptical needs service.

To order parts or to contact a TRUE Authorized Service representative, please visit www.truefitness.com.

CLEANING THE EQUIPMENT:

After Each Use:
Use GymWipes™ Antibacterial wipes or spray a solution of 30 parts water to 1 part mild detergent to dampen a soft cloth and wipe all exposed surfaces.

Use a LCD/screen cleaner or spray a solution of 1 part 91% isopropyl alcohol and 1 part water to dampen a soft cloth and wipe the surface of the console. This helps remove fingerprints, dust, and dirt

Weekly:
Vacuum any dust or dirt that might have accumulated under or around the elliptical or any cover vents.

*Clogged air vents can prevent adequate cooling, causing a shortened life.

⚠️ CAUTION:
Do not use any acidic cleaners. Doing so will weaken the paint or powder coatings and may void the TRUE Fitness Warranty. Never pour water or spray liquids on any part of the elliptical. Allow the elliptical to dry completely before using. Frequently vacuum the floor underneath the unit to prevent the accumulation of dust and dirt, which can affect the smooth operation of the unit. Use a soft nylon scrub brush to clean the foot pads. Most of the working mechanisms are protected inside the covers and base of the elliptical. However, for efficient operation, the elliptical relies on low friction. To keep the friction low, the unit’s belts, foot pads, pedals or pedal arms, and internal mechanisms must be as clean as possible.
CHAPTER 5: CARE & MAINTENANCE

LEVELING THE UNIT:
The elliptical has adjustable feet. Make sure that the running surface is level. If the elliptical is placed on an uneven surface, adjusting the feet can help, but may not compensate for extremely uneven surfaces.

⚠️ CAUTION:
If the elliptical is not level the user may experience knocking or clicking sounds.

OTHER SCHEDULED PREVENTIVE MAINTENANCE:
TRUE recommends that quarterly scheduled maintenance be performed by a qualified service technician. Please contact your dealer or visit www.truefitness.com to contact a local TRUE authorized service technician.

Scheduled Preventive Maintenance:
- Record time, distance and hours from the console.
- Check error log in console.
- Remove shroud covers and vacuum any debris out of the speed sensor, control electronics and moving parts.
- Move unit and vacuum underneath.
- Check belt tension and tracking.
- Inspect all fasteners.
- Inspect all electrical connections.
- Inspect all components for abnormal or premature wear.

⚠️ CAUTION:
Use only TRUE Fitness certified service providers.

LONG TERM STORAGE:
When the elliptical is not in use for any length of time, turn it off. Make sure that the power cord is unplugged from the power source and is positioned so that it will not become damaged or interfere with people or other equipment.

Storing the Chest Strap:
Store the chest strap in a place where it remains free of dust and dirt such as, in a closet or drawer. Be sure to protect the chest strap from extremes in temperature. Do not store it in a place that may be exposed to temperatures below 32° F (0° C). To clean the chest strap, use a sponge or soft cloth dampened in mild soap and water. Dry the surface thoroughly with a clean towel.
CHAPTER 6: CUSTOMER SERVICE

CONTACTING SERVICE:
TRUE Fitness recommends that you gather the serial number, model number, and a brief description of the reason for the request. After information has been gathered you may choose to contact your selling dealer or local service company to set an appointment. (If you are not familiar with who is in your area, you may visit our website at www.truefitness.com and use our dealer locator to obtain the contact information for the closest dealer).

You may also contact TRUE Fitness’ customer support team by calling 800.883.8783 or e-mailing us at service@truefitness.com Monday – Friday during normal business hours.

TRUE FITNESS SERVICE DEPARTMENT
865 HOFF ROAD
ST. LOUIS, MO 63366
1.800.883.8783
HOURS OF OPERATION: 8:30 A.M. - 5:00 P.M. CST
E-MAIL: service@truefitness.com

CONTACTING SALES:
Interested in TRUE Products? Please contact us with any sales or product inquires so that we may direct you to the appropriate sales representative to answer your questions.

TRUE FITNESS HOME OFFICE
865 HOFF ROAD
ST. LOUIS, MO 63366
1.800.426.6570
HOURS OF OPERATION: 8:30 A.M. - 5:00 P.M. CST
E-MAIL: sales@truefitness.com
REPORTING FREIGHT OR PARTS DAMAGE:
Unfortunately, sometimes materials can be damaged during shipment. If materials are damaged during shipment, please follow the guidelines below to determine the appropriate process for you to follow in case of damages.

**Severe Damage:**
Obvious damage to external packaging / internal product. Please **refuse** the shipment and it will be returned to TRUE Fitness by the carrier. Contact the TRUE Fitness customer support team by calling 800.883.8783 or sales support team by calling 800.426.6570 Monday-Friday during normal business hours to notify us that the shipment has been refused. Once we have received the damaged shipment, a replacement shipment will be sent to you. Only refuse the damaged piece if the shipment is multiple boxes.

**Slight Damage:**
The box may have minimal damages and you are not sure if the actual product is damaged or not. You **must** sign the bill of lading as damaged when accepting the shipment. Once you have opened the box and you have determined something is indeed damaged please gather the serial number, model number, description and photos of damages. Please make sure the photos include the damaged product as well as the damaged box the product arrived in. Contact the TRUE Fitness customer support team by calling 800.883.8783 or sales support team by calling 800.426.6570 Monday-Friday during normal business hours.

**Concealed Damage:**
You may receive a shipment that looks intact and discover once the box has been opened that there are hidden damages. Please notify the carrier **immediately**. We will not be able to file a claim if the carrier is not notified in a timely manner. Once you have called the carrier you will need to gather the serial number, model number, description and photos of damages. Contact the TRUE Fitness customer support team by calling 800.883.8783 or sales support team by calling 800.426.6570 Monday-Friday during normal business hours.
## TROUBLESHOOTING GUIDE:

This troubleshooting guide is intended to assist in diagnostics only and is not all inclusive. Technical specifications, error codes and programming are subject to change without notice. TRUE accepts no liability for any damage or loss suffered by persons whom rely wholly or in part on any description or statement contained within this manual. Please visit www.truefitness.com to obtain the most recent version of all manuals and contact the TRUE Service Department at 800-883-8783 for assistance with troubleshooting and diagnostics.

Labor

| Parts  | 1 Year |
|        | Cosmetic  | 6 Months |

iPod® Connectivity: iPod connectivity elements; headphone jack, connector and USB Port are warranted for defects in material and workmanship for 6 months with no labor warranty.

Labor: Labor is covered for a period of one year from the date of purchase unless otherwise expressed within this limited warranty as long as a TRUE authorized service provider performs the service. Service that requires over 50 miles of travel may be subject to additional charges. Reasonable and necessary maintenance guidelines can be found in the owner’s manual.

Claims Procedure: TRUE Limited Warranty service may be obtained by contacting the authorized TRUE dealer from whom the Product was purchased. If the dealer from whom the Product was purchased is no longer an authorized TRUE dealer, then TRUE Limited Warranty service may be obtained by contacting TRUE directly at:

TRUE Fitness, Service Department
865 Hoff Road, St. Louis, MO 63366
1.800.883.8783
Hours of operation 8:30am - 5:00 pm CST

The above Limited Warranty is subject to and will be in accordance with the conditions set forth below:

1. This Limited Warranty can be processed only if the Warranty Registration Form is completed on-line; or if the attached form is filled in, signed by the original purchaser and mailed to TRUE within 30 days of purchaser’s receipt of this Product. The serial number must be intact on the Product for this Limited Warranty to be valid.

2. This Limited Warranty applies to the product only while the product remains in the possession of the original purchaser and is not transferable.

3. This Limited Warranty becomes VALID ONLY if the Product is initially assembled/installed by a TRUE authorized dealer/technician (if anyone other than a TRUE authorized dealer/technician initially assembles and installs the Product, this Limited Warranty will be void unless the written authorization of TRUE is first obtained).

NOTE: Warranty valid for USA and Canada only.

Frame: The frame is warranted for defects in material and workmanship for as long as the original purchaser owns the Product. The frame is warranted for labor and freight (for parts shipped from TRUE) for one year from date of purchase. * This limited warranty on structural frame does not include paint or coatings.

Parts: The elliptical electrical parts and wear items are warranted for defects in material and workmanship for seven years with one year labor warranty. This limited warranty does not cover damage or equipment failure resulting from or caused by improper assembly/installation, failure to follow instructions and warnings in owner’s manual, accident, misuse, abuse, unauthorized modification, or failure to provide reasonable and necessary maintenance. *TRUE Fitness shall not warrant the performance of the heart rate system on its products, as the heart rate system performance varies, based on user’s physiology, age, method of use and other factors.

* This limited warranty shall not apply to software version upgrades.

Cosmetics: The elliptical cosmetic parts are warranted for defects in material and workmanship for six months with labor warranty to match the parts warranty period. This limited warranty does not cover damage or equipment failure resulting from or caused by improper assembly/installation, failure to follow instructions and warnings in owner’s manual, accident, misuse, abuse, unauthorized modification, or failure to provide reasonable and necessary maintenance. This limited warranty will apply to but may not be limited to paint/coatings, covers/caps, badges, overlays, pedal, pedal strap and seat cushions.

4. This Limited Warranty does not cover damage or equipment failure resulting from or caused by improper assembly/installation, failure to follow instructions and warnings in owner’s manual, accident, misuse, abuse, unauthorized modification, or failure to provide reasonable and necessary maintenance (as referenced in the owner’s manual.)

5. This Limited Warranty applies only to the cost of repair or replacement of parts and does not include labor (beyond the above warranty period), transportation, service, return and freight charges associated there with expressly specified herein.

6. This Limited Warranty shall not apply to: Service calls to correct installation of the equipment or instruction to owners on how to use the equipment; or any labor costs incurred beyond the applicable labor warranty period.

7. This Limited Warranty is in lieu of all warranties, express or implied, and in lieu of all other obligations or liabilities on the part of TRUE, under no circumstances shall TRUE be liable by virtue of this Limited Warranty or otherwise from damage to any person or property whatsoever for any special, indirect, incidental, secondary or consequential losses, damages or expenses in connection with exercise products. Any implied warranty is limited in duration to the time period covered by the Limited Warranty. Some states do not allow limitations on how long an implied warranty lasts, or the exclusion may not apply to you. This Limited Warranty grants you specific legal rights and you may also have other rights, which vary from state to state.

NOTE TO AUTHORIZED WARRANTY LABOR PROVIDERS:
Warranty labor reimbursement or warranty parts rights may not be transferred to, reassigned to, a third party without the express written consent of TRUE. Even jobbing out warranty labor requires TRUE’s written approval.

ELLiptical SERIAL NUMBERS:
The PS300 ellipticals come with two serial numbers; one on the base and one on the display console (see diagram below). The serial number on the base is located on bottom of the crossbar. The console serial number is located on the bottom right side of each console. Please write down your serial numbers below and keep for your records.
