

TRUE® Performance 8000 Treadmill

Premium Feel. Customizable Experience.

Meet the TRUE Performance 8000 Treadmill

The **TRUE Performance 8000 Treadmill** offers a premium, customizable experience featuring Soft Select. Built to withstand the toughest workouts, the Performance 8000 combines smooth, quiet quality with unflinching durability.

Your Fitness Experience

Constructed with commercial-grade materials and premium components, so each piece of equipment feels and functions like a commercial machine, while in the comfort of your home.

Your Body Will Thank You

The TRUE FITX System and Orthopedic Belt offer the highest level of impact reduction for your joints and knees. The 8000 treadmill features our exclusive TRUE Soft Select® adjustable deck cushioning, allowing you to customize the feel.

Maximize Your Workouts

TRUE HRC allows you to enter your target heart rate for maximum results. Our one touch TRUE HRC Heart Rate Cruise Control™ allows you to use HR at anytime in your workout and will adjust speed and incline automatically once you hit your target HR.

Compatible with Zwift technology

Track your workouts using the GymTrakr App

HRC® Cruise Control gradually adjusts speed and incline to maintain constant target heart rate throughout workout

Includes Heart Rate Strap

Bluetooth® and Polar Heart Rate Compatible*

Orthopedic belt for additional reduced impact on joints and knees

The TRUE FITX System decreases impact and stress on your joints

Large running surface for a better, safer workout

With one simple adjustment, Soft Select® adjustable deck provides cushion levels from soft like a track to firm like pavement

8.5" LCD

- Quick keys, connectivity, and challenging programs
- Up to four (4) user profiles

Warranties outside the U.S. and Canada may vary - Please contact your dealer for details. Specifications subject to change without notice.

*The stated "Horsepower"/ "continuous Horsepower" (HP/CHP) is a standard reference in the treadmill market, primarily used to aid consumers in making comparisons. This CHP rating is ascertained via lab-based dynamometer tests, which evaluate the mechanical prowess of the motor. Its important to note, however, that the CHP rating is not reflective of the treadmill's working horsepower in a regular home setting. In everyday domestic use, the motor's horsepower doesn't correspond to the CHP value displayed.
